Meet OwlneSt Lume

A low-blue sleep-spectrum lamp designed for the last part of your evening.

Nighttime light, without daytime brightness.

What Lume is

- A gentle source of light for winding down, reading briefly, or moving through low-light moments at night.
- A simple lamp with one bottom button - no app, Bluetooth, clock, speaker, projector, alarm, or color-changing modes.

What Lume is not

Lume is not a medical device or treatment, and it does not promise instant sleep. It is also not intended as bright task lighting or the sole light for safe navigation.

Setup and nighttime use

A short routine is all you need.

1

Unpack and inspect

Confirm that the lamp and USB-C cable are present. Do not use the lamp or cable if either appears damaged.

2

Charge before first use

Connect the supplied USB-C cable to the port on the base and a suitable USB power source.

3

Choose a stable location

Place Lume upright on a dry, level surface away from water, open flame, heaters, and fabric that could cover the lamp.

4

Turn on from the base

Press the bottom button to control the lamp. Keep the port and button clean and dry.

5

Let brighter lights step back

Use Lume during the last 1-2 hours before bed while reducing brighter overhead and cool-white lighting.

A SIMPLE EVENING ROUTINE

Ease the room

Dim or switch off brighter lights, then use Lume as the room settles.

At bedtime

Switch Lume off when you are ready to sleep, unless a small amount of light is still needed.

During the night

For brief wakeups, use the lowest amount of light that lets you move safely.

Important

Light is one part of an evening routine. Sleep can also be affected by timing, stress, noise, temperature, caffeine, and individual health factors.

Simple by design

One bottom button and one USB-C charging port.

BOTTOM BUTTON

Press to control

The control is located on the underside of the wooden base. Lift the lamp carefully with dry hands when reaching it.

USB-C PORT

Recharge safely

Use the supplied cable with a suitable USB power source. Insert and remove the connector gently without twisting it.

- Charge on a dry, ventilated surface.
- Keep the port free of dust and moisture.
- Disconnect if the lamp, cable, or connector becomes unusually hot or damaged.

Battery care

Do not disassemble, puncture, crush, burn, or expose the lamp to extreme heat. If the body swells, leaks, smells unusual, or is physically damaged, stop using it and contact OwlneSt.

Keep Lume in good shape

Use common sense around electricity, heat, water, and nighttime movement.

Placement

- Use indoors on a stable, level, dry surface.
- Keep away from sinks, bathtubs, open flame, heaters, and direct heat.
- Do not cover the lamp while it is on or charging.
- Keep cords out of walkways and away from children and pets.

Everyday use

- Use with dry hands and do not immerse the lamp in water.
- Do not stare closely into the light for extended periods.
- Do not open, modify, or attempt internal repairs.
- Stop use after a hard impact or if any part appears damaged.

Cleaning

- Switch off and disconnect the charging cable.
- Wipe with a soft, dry cloth.
- Do not use solvents, abrasive cleaners, or sprays.
- Let the lamp remain fully dry before reconnecting power.

Nighttime safety

- Lume is not bright task lighting.
- Use additional lighting where steps, obstacles, or hazards require clear visibility.
- This product is not a toy. Adult supervision is recommended around children.
